Ozane's Mosquito Program features monthly treatments of your lawn, shrubs, and other areas mosquitoes inhabit with our new Mister Blower Machine. The Mister Blower Machine emits small enough particles to reach all treatment surfaces without it drifting off target. The pesticide emitted from the machine will kill mosquitoes for up to 30 days after application.

For the best results, we recommend monthly treatments from May through September.

Mosquitoes can breed in containers as small as a bottle cap, so it is important for you to take steps to reduce the population near your home.

Mosquitoes can **transmit diseases like West Nile Virus**. They can also **transmit heartworms to your pets**. Here are some measures you can take to reduce the risk of your family becoming the next victim of a mosquito bite:

» Get rid of old tires, tin cans, buckets, drums, bottles or any water-holding containers.

» Keep roof gutters free of leaves and other debris.

**Ask about our LeafDefier™ Gutter Protection System!**

» Keep grass cut and shrubbery well trimmed around the house so adult mosquitoes will not hide there.

» **Sign up for Ozane's Mosquito Program and begin suppressing mosquito populations on your property.**
